Summary

Third-year Networks & Telecommunications student (BUT, Cybersecurity track). 3-month cybersecurity internship at BULATSA (air navigation, NIS2 essential entity): built production SIEM log parsers, monitored SOC alerts, supported vulnerability management. Seeking an internship or junior role in SOC, detection engineering or cyber risk management.

Experience

BULATSA (Bulgarian Air Traffic Services Authority)

May – Jul 2026 (3 months)

Cybersecurity Intern, Information Systems Directorate

Sofia, Bulgaria

Critical-infrastructure operator (NIS2 essential entity); rotation across ICT Governance, Network Infrastructure and the SOC.

- Brought 4 unparsed production log sources into the SIEM by building custom XML parsers in NetWitness (Log Parser Tool v2): Traefik reverse proxy (JSON over syslog), Keycloak IdP (OIDC, Cyrillic values), Imperva WAF, NetFlow (CEF). Passed platform-admin review with zero corrections; deployed to production.
- Enabled single-query session tracing from network flow to IdP login via shared Unified Data Model pivot keys.
- Triaged WAF alerts (known-CVE exploitation attempts, directory traversal, false positives), flagged authentication abuse on the IdP, pivoted in NetWitness Investigate and documented incidents per playbooks.
- Ran internal vulnerability scans and prioritized findings by CVSS, CVE/NVD correlation and asset inventory; contributed to a security policy review against ISO/IEC 27005 and NIS2.
- Designed and built an end-to-end Python prototype that ranks exposed web assets by contextual risk (0–100 score, P1–P5): 4-stage async pipeline (httpx, Playwright, Pydantic), LLM classification (LangGraph) bounded by an auditable rule engine, NVD, EPSS and CISA KEV data. On a test target, narrowed 1,428 discovered assets to 12 risk-scored ones.
- Observed an executive cyber-crisis tabletop exercise (NIST CSF 2.0, ransomware scenario).

Rated "outstanding" by internship supervisor (attention to detail, autonomy, teamwork); recommendation letter available.

A1 Group

2025 (3 months)

Network Operations Center (NOC) Intern

Sofia, Bulgaria

- Monitored fixed/IP networks in real time (transport links, customer access lines) in a 24/7 NOC with alarm-correlation tools.
- Analyzed incidents (latency, packet loss, error rates) and helped prioritize tickets by customer impact and SLAs.
- Helped troubleshoot links and configurations, escalated to field and engineering teams, followed up to restoration.

Education

Université Sorbonne Paris Nord, IUT de Villetaneuse

2024 – 2027

Bachelor of Technology (BUT, 180 ECTS) in Networks & Telecommunications, Cybersecurity track (currently in Year 3)

Lycée privé Saint-Pierre, Calais, France

2021 – 2024

Baccalauréat (general), Mathematics and English majors, with honors (Mention Bien); named "Most Deserving Student"

Skills

SOC & detection	NetWitness SIEM (XML log parsers, Unified Data Model, Investigate), alert triage, multi-source correlation, regex, syslog, JSON, CEF, NetFlow, Imperva WAF, Keycloak IdP (OIDC), MITRE ATT&CK
GRC	ISO/IEC 27001 & 27005, NIS2, NIST CSF 2.0, CIA/DICP; CVE, CVSS, NVD, EPSS, CISA KEV, TLP 2.0
Pentesting	Kali Linux, Metasploitable, Nessus (university project): penetration testing, exploitation, reporting
Networking	TCP/IP (HTTP, DNS, SSH, FTP), routing & switching (Cisco IOS, GNS3, Packet Tracer), VLANs, DMZ, firewalls, OpenVPN, LAN/WAN, wireless, VoIP/SIP (PABX, IP-PBX), fiber optics (WDM, OTDR, splicing)
Systems	Linux and Windows administration, Active Directory, DNS, DHCP; virtualization (VMware, VirtualBox)
Development	Python (asyncio, httpx, Playwright, BeautifulSoup, Pydantic, TCP/UDP sockets), LangGraph, LLM APIs, Bash, SQL/MySQL, PHP, HTML/CSS/JavaScript, Git

Languages

Bulgarian (native), **French** (C2), **English** (C1), **Spanish** (A2)

Interests

Handball: 10 years of team play; plays in France's Nationale 3 league (men) and member of the Bulgarian national team. English literature, foreign cultures, community associations, cybersecurity and AI tech watch.
