EDUCATION

Bachelor of Technology (BUT, 180 ECTS) in Networks & Telecommunications, Cybersecurity track
Sorbonne Paris Nord University, IUT de Villetaneuse
2024 – 2027

High School Diploma, with honors (Mention Bien)
Private High School Saint-Pierre, Calais, France
2021 – 2024
Mathematics and English majors; named "Most Deserving Student"

SKILLS

Detection & response
SIEM (NetWitness in production; Splunk, Chronicle in labs), IDS (Suricata), traffic analysis (Wireshark), log analysis, alert triage, incident response, digital forensics, threat hunting, threat intelligence, MITRE ATT&CK

Security & risk
Vulnerability management (Nessus, CVSS), penetration testing (Kali Linux), cryptography, firewalls, VPN (OpenVPN), network segmentation, IAM, risk analysis (ISO/IEC 27005, CIA triad), ISO/IEC 27001, NIS2, NIST CSF, GDPR

Networking
TCP/IP (HTTP, DNS, SSH, FTP), routing & switching (Packet Tracer, GNS3), VLANs, network monitoring

Systems
Linux and Windows administration, Active Directory, DNS, DHCP, virtualization (VMware, VirtualBox)

Programming
Python (automation, TCP/UDP sockets, LLM APIs), SQL (MySQL), Bash, Git

LANGUAGES

Bulgarian	Native
French	C2
English	C1
Spanish	A2

SUMMARY

Third-year Cybersecurity student with two internships in operational environments. Strong interest in security operations, network monitoring and incident analysis. Rigorous, committed team player seeking an opportunity in cybersecurity, networking or system administration.

EXPERIENCE

BULATSA
May – Jul 2026 (3 months)
Bulgarian Air Traffic Services Authority

Cybersecurity Intern, Information Systems Directorate — Sofia, Bulgaria
ICT Governance, Network Infrastructure, Security Operations Center.

- Built log parsers for the NetWitness SIEM.
- Triaged SOC alerts, investigated incidents and documented them according to playbooks.
- Ran vulnerability scans and prioritized findings by CVSS; reviewed security policies against ISO/IEC 27005 and NIS2.
- Built a Python prototype that prioritizes risks on exposed web assets, combining an LLM with a rule engine.

A1 Group
2025 (3 months)

Network Operations Center (NOC) Intern — Sofia, Bulgaria

- Monitored fixed and IP networks in real time (transport links, customer access lines) with alarm-correlation tools.
- Analyzed incidents (latency, packet loss, errors) and helped prioritize and resolve tickets based on customer impact and SLAs.
- Supported troubleshooting (link and configuration checks), escalated to field and engineering teams and followed up until service was restored.
- Developed operational reflexes in a 24/7 environment, working with cross-functional teams.

UNIVERSITY PROJECTS

- **Penetration testing:** built a test lab (Kali Linux, Metasploitable, Nessus), exploited vulnerabilities, wrote a technical report.
- **Secure multi-site network:** designed the architecture (firewalls, encryption, segmentation), IAM, security audit (CIA triad).
- **Optical transmission:** designed a ring network (WDM, OADM, FBG) above 1 Gbit/s; fiber splicing and OTDR measurements.

CERTIFICATIONS

IBM Generative AI Engineering Professional Certificate — Nov 2026
IBM Cybersecurity Analyst Professional Certificate — Oct 2026
Google Cybersecurity Professional Certificate — Sep 2026

INTERESTS

Handball: 10 years of team play; plays in France's Nationale 3 league (men) and member of the Bulgarian national team
