ABOUT ME

Second-year Networks & Telecommunications student specializing in cybersecurity, seeking an internship to grow skills in system administration, security and network operations in a demanding environment.

- Strong interest in security operations, network monitoring and incident analysis.
- Team-oriented, organized and reliable, with operational reflexes

EDUCATION

SORBONNE PARIS NORD UNIVERSITY – IUT DE VILLETANEUSE

Bachelor Universitaire de Technologie en Réseaux et Télécommunications
2024 – 2027

LYCÉE PRIVÉ SAINT-PIERRE CALAIS

Baccalauréat général – Spécialités : Mathématiques et Anglais
Mention Bien
"élève le plus méritant" du lycée
2021 – 2024

INTERESTS

Handball: active member of a team for 10 years, currently a player in Nationale 3 Men and member of the Bulgarian national team

- English literature
- Passion for foreign cultures
- Associative activities
- Cybersecurity

LANGUAGES

Bulgarian (Mother tongue)
French (C2)
English (C1)
Spanish (A1)

WORK EXPERIENCE

A1 – SOFIA, BULGARIA

Internship – 2025(3 months)

NOC (Network Operations Center)

- Monitored fixed and IP network infrastructure in real time, focusing on transport links and customer access lines using supervision and alarm correlation tools.
- Helped analyze incidents (latency, packet loss, error rates) and prioritize tickets according to service impact and SLAs.
- Contributed to troubleshooting activities (link checks, basic configuration verification, escalation to field/engineering teams, follow-up until service restoration).
- Gained strong operational reflexes and familiarity with structured procedures and 24/7 network operations environments.

TECHNICAL SKILLS

ADMINISTRATION

Network Configuration & Monitoring :

- LAN/WAN setup
- Firewall & OpenVPN management
- Network monitoring

System Administration :

- Linux/Windows/iOS Server management
- Active Directory, DNS, DHCP administration
- Virtualization (VMware, VirtualBox, GNS3, Cisco Packet Tracer)

CONNECTION

Core Networking

- TCP/IP stack & protocols (HTTP, DNS, SSH, FTP)

- Routing & Switching

- Wireless networks

Telecom Technologies

- VoIP & SIP (PABX, IPBX)
- Fiber-optic cabling

PROGRAMATION

Scripting & Automation

- Bash scripting
- Python
- HTML

- CSS

- JavaScript

Database

- PHP
- MySQL

UNIVERSITY PROJECTS

DISCOVERING PENTESTING

- Key Skills: Installation and configuration of a testing environment (Kali Linux, Metasploitable, Nessus), penetration testing, vulnerability analysis, exploitation of security flaws, technical report writing and result presentation

DEVELOPING COMMUNICATING APPLICATIONS

- Key Skills: Design and development of a Python client/server application (TCP/UDP), user authentication, data backup, graphical interface (Web or mobile), project management with version control and collaborative tools

DESIGNING A SECURE MULTI-SITE COMPUTER NETWORK

- Key Skills: Network needs analysis, design of a secure architecture (firewalls, encryption, segmentation), access and identity management, cybersecurity awareness, DICP auditing (Availability, Integrity, Confidentiality, Proof)
